Metrologic's MS9500 Series Voyager™ has been cleared for takeoff! With a futuristic design and advanced scanning system, Voyager is the most advanced single-line, hand-held bar code scanner on the market today.

The Voyager MS9540 features Metrologic's proprietary CodeGate technology. CodeGate is an intuitive scanning system that is ideal for all scanning applications, including menu-scanning, Point-of-Sale, document processing, and inventory, just to name a few.

CodeGate works hand-in-hand with Metrologic's patented automatic-triggering scheme. Simply present a bar code to the scanner; the highly visible 650-nanometer laser is automatically activated allowing the user to easily select the bar code to be scanned. Press the CodeGate button and the data is transmitted to the host system.

Equipped with both In-Stand and Out-of-Stand operation, Voyager can be used as both a hand-held and fixed projection scanner. Voyager automatically senses when it is placed in the stand and de-activates the CodeGate button.
