Metrologic's VoyagerBT offers convenience and the freedom of mobility by incorporating Bluetooth wireless technology. This latest member of the Voyager Series continues the trend of combining patented technology, high performance, and a futuristic design.

VoyagerBT provides a lightweight, comfortable, and easy to use scanning solution. The patented CodeGate feature remains at the core of the scanner's functionality. The scanner wakes with a touch of the CodeGate button activating the IR sensor. After scanning a bar code, simply press the CodeGate button and the data is transmitted wirelessly to the host. Operators will find the brightly-lit laser easy to see and to line up on a

desired bar code making VoyagerBT perfect for menu scanning applications.

Scanning large or heavy products can be done quickly and easily. VoyagerBT offers check-out personnel the ability to scan bulky items without the need for unnecessary heavy lifting by customers or check out personnel, making for added convenience.

VoyagerBT includes the ability to decode Reduced Space Symbology (RSS) bar codes. VoyagerBT can be used in applications including supermarkets, hypermarkets, warehouse shopping clubs, retailers, light warehouse and manufacturing.
