

USB to PS/2 Converter (Decoder Wedge)

The **RW201** is a USB converter for conventional scanner bridging to a host via USB interface. Two models are available for IBM PC or compatible or iMac computer in providing 2 down stream connectors, PS/2 and PS/2, or, PS/2 and ADB, one for scanner and one for keyboard. This combination design features that both scanner and keyboard work under one device.

Application of the RW201, a device setting of the scanner must function as keyboard emulation.
